

# MAN ENERGY SOLUTIONS SOUTH AFRICA DRIVE TOWARDS EFFICIENCY

## ABOUT

**MAN Energy Solutions South Africa** is a member of the MAN Energy Solutions group.

They specialise in designing, manufacturing, and refurbishing rotating equipment for industrial manufacturing, power generation, and marine propulsion.

They provide original equipment supply and after-sales services, including reverse engineering and modifying existing equipment.

## CHALLENGE

Since their team quickly grew, they recognised the significance of working together and having a collection of tools that could be used during the hard lockdown.

In addition, they required a data management solution that could be expanded as needed, quickly accessed, and easily adjusted to fit their team's workflow.

## SOLUTION

Implementing **3DEXPERIENCE SOLIDWORKS Premium**.

## RESULTS

- A cloud-based workspace that provides real-time project updates and team collaboration, accessible from anywhere.
- A scalable and affordable data management solution that can be quickly deployed and expanded for future teams.
- A flexible system with fully customisable interfaces tailored to the team's needs.

“ Having **3DEXPERIENCE** makes sense - especially on bigger projects where we would not be able to survive without it. ”

**Peter Randall**  
Senior Engineer
