

SENWES

OPTIMISING AGRICULTURAL DESIGN

ABOUT

Senwes, a company with a history of dating back to 1909, was born out of a vision for sustainable grain handling and seed processing.

Over the years, it evolved from a cooperative into a profit-driven entity, diversifying and expanding its operations across South Africa and East Germany.

Senwes plays a vital role in the agricultural industry, constructing and maintaining large-scale grain storage silos.

CHALLENGE

Senwes needed better 3D design tools to improve their existing designs and reduce turnaround time for new implementations.

With only 2D CAD packages, they sought a solution to enhance efficiency, time-to-market, and overall productivity.

SOLUTION

Implementing **SOLIDWORKS 3D CAD Premium**.

RESULTS

- Streamlined design processes.
- Reduced time-to-market and associated costs.
- Improved structural integrity
- Enhanced airflow
- Better HVAC system designs

“ Using **SOLIDWORKS** has significantly reduced our time-to-market and associated costs. ”
