

THULA SOLUTIONS

OFF-ROAD ELECTRIC ADVENTURES

ABOUT

Thula Solutions was founded in 2017 with a mission to provide sustainable solutions for living in the African bush.

Their expertise lies in eco-tourism and agriculture, and they are proud to have launched South Africa's first all-electric, all-wheel-drive game vehicle.

Their dedication to eco-tourism allows for a more authentic and sustainable African experience while preserving the natural beauty of the wilderness.

CHALLENGE

Thula Solutions faced workflow challenges due to geographical constraints and limited version control.

They sought a solution to streamline their design workflow and enable rapid onboarding and collaboration among dispersed team members.

SOLUTION

Implementing **SOLIDWORKS PDM** Professional.

RESULTS

- Streamlined designs and optimised workflows for efficient collaboration.
- Enhanced version control to ensure data integrity, prevent errors and data loss.
- Seamless collaboration to enable geographically dispersed teams to work efficiently.
- Faster design iterations and easy file access boosted productivity.

“ We now have a very secure, very easily implementable PDM system. ”

Mike McDonald
Chief Technical Officer
